

# Quality Policy

Kongsberg Maritime has a vision of shaping the maritime future which is based on three equally important anchors;

- 1) The customer's first choice
- 2) Technology for zero emissions
- 3) People who protect the sea.

Kongsberg Maritime will contribute to our customer's success through excellence in products, solutions, and services.

We achieve quality through implementation and continual improvement of our Business Management System.

Our Business Management System is designed to meet the requirements and expectations of our interested parties and provides internal structure and operational guidelines throughout the global organization. The system is independently audited for compliance with the international standard ISO 9001:2015.

Our certified Business Management System is a significant contributor in our effort to achieve our vision and operational objectives.
